

Skywind Application

TESRenewal Username: DAD COP 2

Country of Residence: USA

Timezone: UTC -05 (Eastern Time)

Interested in: Coding/Scripting/Mechanics,Landscaping

Level of Commitment: Highly active

Skills and Experience: I'm applying for the coding department, though landscaping is something I may eventually want to pick up. I'm a computer engineering student, so my experience is divided between both software and hardware.

Languages I've had experience with: Java, python (and django), C#, ARM Assembly, VHDL, Verilog, R, C, javascript, php, HTML, CSS.

I've also been a lab instructor at my college for computer science for the past year if that counts for anything. I haven't used Papyrus before, but I've had a lot of OOP experience so I'm sure I can learn it fairly quickly.

I don't have a portfolio of any sort, so I just linked a dope song.
