

Skywind Application

TESRenewal Username: ibanez1

Country of Residence: United States

Timezone: UTC -06 (Central Time)

Interested in: Coding/Scripting/Mechanics

Level of Commitment: Moderately active

Skills and Experience: I'm currently a computer / firmware engineer and I have been responsible for maintaining and improving a C++ based object oriented x86 simulator for firmware development. I have also integrated c++ into various other simulation work flows using different languages (embedded perl and verilog integration). I have a lot of experience in script automation and code in perl on a daily basis. I have also done python scripting in the past for various small work projects although my knowledge of that language is only basic. 3d game design may be new to me but learning new languages and coding is not :).
