

Skywind Application

TESRenewal Username: Austin Rearden

Country of Residence: United States

Timezone: UTC -06 (Central Time)

Interested in: Voice Acting

Level of Commitment: Highly active

Skills and Experience: I have been involved in a number of large projects including a Sci-Fi film, that was unfortunately never released. I have voiced for many online film projects including but not limited to Machinima, as well as some documentary work. I have a variable voice and can do many, many different types of voices, accents, ect. (An example of this being my work in a voice over where I voiced 23 different characters) called Halo Dubs. I would love the chance to voice act in your amazing project and am looking forward to your reply.
