Level of Commitment: Highly active

Skills and Experience: My name is Basia Ulczok and I'm a recent graduate with a degree in animation. My passion lies in character and game design. I love The Elder Scrolls series and every so often come back to play them in my free time. I am really excited for this project and would love to be part of it.

I was part of an indie game development team, working as a concept artist and later as a 3D modeler. The game was called Shaman Riddles (an isometric cRPG with puzzle elements), and although the project was too ambitious and we didn't manage to complete it, it gave me an

understanding of a working pipeline.

I also illustrated a sci-fi book called "Baktu" by Jimm Grogan and some of my other illustrations has been published in a Canadian magazine The Concordian.

Before graduating in England, I studied at Academy of Fine Arts in Poland. Studying there gave me essential painting and sculpting skills.

I sent you link to my portfolio as a proof of my work. I do hope I meet your requirements.
