

Skywind Application

TESRenewal Username: Ejektaflex

Country of Residence: United States

Timezone: UTC -06 (Central Time)

Interested in: Coding/Scripting/Mechanics, Landscaping, Sound Effects, Navmeshing

Level of Commitment: Moderately active

Skills and Experience: Computer Science major in college (junior), with code experience in:

Python, Lua, Java, C++, JavaScript, SQL, HTML, Papyrus

I have used the Creation Kit before, and although creativity is not my strong suit (I will admit), I love watching the landscaping videos done by Rebelzize and the landscaping Twitch streams on TESR_Skywind. I'd love to do a little bit of landscaping in areas, or at least navmeshing. I'd be willing to spend time doing the navmeshing so others can spend time doing more important things. I could also work on coding if need be, as I have a decent amount of

programming knowledge in various languages.

As for proof of skills, the link is a picture of one of my git repositories (a little game I'm working on), as well as a photo of some of my Java projects in eclipse. If you want specific code, I can supply some code I've written before. I use Windows 10 on my desktop, and Ubuntu Linux on my laptop.

Here are some images for proof: <http://imgur.com/a/4C4rG>
