Skills and Experience: Along with being an avid fan of TES series for many years, I have been actively pursuing a career in comic books as a writer/artist. I've been writing and drawing for about 20 years. I attended school for film in Phoenix, Az and took courses in screenwriting as well as general writing courses while there. I wrote for a webcomic for almost a year before the creator quit the business.

In my free time I write for one of two pet projects, a novel about time travel and a lovecraftian horror crime noir graphic novel.
