Interested in: Sound Effects

Level of Commitment: Highly active

Skills and Experience: I'm a 21 HND sound engineering student. I've been taught by the best professionals in my country in areas as voice and music recording, sound desingning and live concerts. Also, I've learned to use tons of daws and other software as Pro Tools, Cubase, Smart 7, Mapp, Avid Media Composer, Audition CS6, Presonus Studio One and others.

I don't have any professional experience, that's why I want to work in this project. I love fantasy rpg's and I wish to learn and work as a sound designer in the videogames world.
