

Skywind Application

TESRenewal Username: karltechno

Country of Residence: England

Timezone: UTC (00)

Interested in: Sound Effects

Level of Commitment: Moderately active

Skills and Experience: I am a student currently studying a Sound Design Degree with my main passion lying in game audio. I was originally interested in music production where I have had releases under production music labels but I have since become obsessed with the world of sound design particularly for games.

I have a great knowledge of standard industry DAW's and plugins, Pro Tools, waves, soundtoys etc. I also have a keen ear for detail and can take onboard criticism to make sure my work is perfectly fitting. I am also currently working on sound design for a small student game in UE4.

I would love to get involved in this project and feel free to ask if you want to know any more about my experience or see any additional work.
