Country of Residence: UK

Timezone: UTC (00)

Interested in: Sound Effects

Level of Commitment: Moderately active

Skills and Experience: Long time fan of the Elder Scrolls and have been following this project for a while now, looking for an opportunity to get involved in sound effects. I'm currently in the final semester of a Music Technology and Production degree, good with a few different DAW's, have a good amount of experience in recording and mixing and know my way around synthesisers (although there's much more I could learn about them).

Unfortunately, most of my experience has been in music so I don't have a

portfolio of sound effects to show off. What I do have is some mixes of songs and recordings as well as a wood chopping sound I had a go at before filling this out. The top link is my most recent mix, some older music can also be found on that Soundcloud.
