

Skywind Application

TESRenewal Username: lordofzoobs

Country of Residence: USA

Timezone: UTC -07 (Mountain Time)

Interested in: Coding/Scripting/Mechanics

Level of Commitment: Somewhat active

Skills and Experience: I have a lot of experience with object-oriented programming in Java, C/C++, Python and Ruby. I also have done a lot of Bash and Python scripting and have been employed as a Javascript developer in the past. I do not have any experience in Papyrus and have only dabbled with the CK, but I am willing to learn and feel that I will be able to pick it up fairly quickly.

I have some other, likely non-relevant, skills- I have worked a lot on back-end web design (think databases and business logic in data centers) recently, as well as embedded and hardware design (Verilog and FPGA design) and Linux kernel and Android hacking. I am currently a grad

student researching network security, but I will have some free time for the next few months and over the summer and I would like to contribute in any way I can.

If it helps, I have a B.S. in Computer Science, a B.S. in Electrical Engineering and a M.S. in Electrical Engineering and am working on a PhD in Computer Engineering.

Also, here is my GitHub profile, if you want to look at some of my public activity: <https://github.com/mcoughli>
