

Skywind Application

TESRenewal Username: Midgar

Country of Residence: United States - Ohio

Timezone: UTC -05 (Eastern Time)

Interested in: Music, Sound Effects, Voice Acting, Audi and Video Cut Scene Sync

Level of Commitment: Highly active

Skills and Experience: I am a 3rd year Music Production Student at Full Sail University. I have been in Music since I started playing Piano at age 16. I currently Produce and Write Music for myself and other Musicians. I am looking to get some Volunteer experience in where I can demonstrate my vast Skill Set as a Musician and Producer. I have top of the Line Audio gear and I am highly skilled in Music Writing, Music Theory and Production. Musical Arrangements can be produced in all Audio formats up to the Highest Studio Quality Mix at 192Khz. I can also create Stereo, 7.1 and Spatial Audio Mixes for the most advanced Listening Experience. My passion in Life is to be a sound designer for Video Games. I look

forward to creating professional, high quality audio and compositions as your Lead Sound Designer. The demonstrated projects are more outside the area of Video games except one. I have recently upgraded my studio to top of the line audio processing and will demonstrate high quality mixes produced with such equipment. Given a task or challenge, I can certainly prove my worth to this project.

Example 1 is an Original Composition of what I have deemed a "Return to the City of the Ancients" It is a imagining of what a visit to this Final Fantasy 7 City would have sounded like in a new game, 500 years after the events of FF7. The Second Example is an original composition demonstrating quality of sound, effects and production skills. The third Example is a Project from school with very specific parameters. They made us remix a pop song in whatever format we wished, however we could only use the basic audio software suit that came with our pro tools program. It was quite a challenge and was produced in only 6 hours. I would like an opportunity to demonstrate what I can do on this project with Music for this specific project. I will pour all my spare time and extensive knowledge into this project to give new life to this game and to Extend my protfolio. You can count on me!
