Interested in: Voice Acting

Level of Commitment: Moderately active

Skills and Experience: About 17 years stage acting experience, preferring mainly character acting. Do a cracking Ian McKellan impression among many other voices. I did Computer Games Development at the UWS in Scotland as well which included 3D modelling and animation but by the looks of it you guys have it handled in a big way.

Attached is a link to the parody Bloodhunter Theme tune that I wrote for a Game at Uni. A fellow student came up with the cliché cheesy name and I just went with it. The song still gives me a laugh :)
