Skype Username: sweet.giorni

Country of Residence: United States

Timezone: UTC -08 (Pacific Time)

Interested in: Coding/Scripting/Mechanics

Level of Commitment: Moderately active

Skills and Experience: I am a college student and I plan on majoring in computer science.

I'm most fluent in C++; I've also used C# for a few small programs.

I like to dabble in asm and reverse engineering programs, although I'm not very good at it. (Getting better all the time though!)

In terms of scripting, I spent a good amount of time writing scripts for Arma 3. The Arma 3 scripting language is poorly documented and many of the game's functions don't work, so I learned a lot about making hacky workarounds.
