Skills and Experience: I am a sound engineer working in Hollywood California.

I have never made a mod, but I have a decent understanding of the process.

I'm simply here to offer my services as a sound engineer, wherever you may need them.

I'm linking the recording studio as "proof of skills".

I've been there for about a year, and have worked on various projects that have come through in that time.

I really don't have a personal portfolio anywhere online.
