Country of Residence: United States

Timezone: UTC -06 (Central Time)

Interested in: Coding/Scripting/Mechanics,Landscaping

Level of Commitment: Highly active

Skills and Experience: 2+ years as a professional full stack developer mainly using the Microsoft stack. Relevant languages include C#,Javascript,sql

1+ years working on small games and projects in the Unity Game engine.(Working a few games of my own as we speak, I am willing to put them on hold for this project since I am simply amazed with what you all have done and want to do.)

2+ years of working with clients to make option and stock trading applications in multiple languages (C#,Java,Python)

Computer Science BS degree from Austin College (Sherman,TX), 4yr private college.

I have used the morrowind and skyrim creation kit for small mods many years ago. Morrowind I worked on some factions and quest mods, skyrim was more of just playing around with enviroments.

AND MOST IMPORTANTLY!

A love for the Elder Scrolls series and the idea of this project.

PS. Landscaping sounds like a great time, if you are willing to have an amateur take a shot I gladly will.
