

# Skywind Application

**TESRenewal Username:** Ulfhednar

**Email Address:** fade4luf@gmail.com

**Skype Username:** do you Slack?

**Country of Residence:** USA

**Timezone:** UTC -06 (Central Time)

**Interested in:** Coding/Scripting/Mechanics,Voice Acting,IT infrastructure management/design

**Level of Commitment:** Somewhat active

**Skills and Experience:** I script daily in my professional career, primarily in PERL & Powershell, although Ruby has been my focus more recently. I'm usually automating backend/server tasks, manipulating data structures, and generating custom reports. I manage a medium-sized datacenter, WAN/LAN networks, maintain a Coldfusion/jQuery/Ajax/CSS codebase, and dev support for a custom iOS app.

I do not have experience in Papyrus or CK, but I am an autodidact and

learn quickly.

If you need help either on the scripting side or with dev support (unit testing, debugging, QA), I would be happy to help. If not, I have studio recording equipment (wife does VO), and her or myself could pitch in on that front.
