

Skywind Application

TESRenewal Username: Voobus

Country of Residence: USA

Timezone: UTC -06 (Central Time)

Interested in: Coding/Scripting/Mechanics

Level of Commitment: Moderately active

Skills and Experience: I've been a professional Front End Web Developer for a few years now; my main focus has been javascript--even server side, using Node.js. I'm also experienced in Java, C#, and a handful of other languages.

I am currently going through the Papyrus tutorials, but I have played with the CK quite a bit, especially back in my Morrowind days.

(The link to my resume {link #2} does not contain my current job role, but it is also as a Front End Developer)

I learn very quickly, and am able to pivot and adapt.
