Skype Username: krissteinarandersen

Country of Residence: Danmark

Timezone: UTC +01

Interested in: Voice Acting, Translation - Danish

Level of Commitment: Moderately active

Skills and Experience: Back in the days before I got modelling tools or anything, I used to be a game tester. Nothing I find relevant to the project, but perhaps you do in case of testing the mod (although you probably do that yourself).

I am capable of speaking multiple languages, some of which happens to be german, danish and english.

I don't find my voice to be the most, bearable thing in the world. I really like to voice act, but I got a lisp, and it's not the best thing in the world if

you ask me.

I got top grades in english and almost top grades in danish (12 is top grade in Denmark and is given the letter a on official papers)

I have not made any kind of mods in Skyrim as of yet, though I have been planning to make a new follower to test my voice acting.

I have never tried modding landscapes using Skyrim's engine or anything like that. Willing to learn though ^.^

As for proof of my "skill" in translating, I've made a page translating some dialogue of the game from english to danish.
